

Blue Mount Quarry is located in scenic White Hall, Maryland off of Interstate 83. Blue Mount Quarry provides Baltimore area contractors another source for various sized crushed stone aggregates for use on construction projects.

Blue Mount Quarry, was recently awarded Maryland State Highway Administration's stamp of approval in the 2009 Aggregate Bulletin, which tests quarries throughout the state for uses on state road projects. See attached MD SHA 2009 Test Data Bulletin.

Our construction aggregates are used for many projects including but not limited to:

- As a base material underneath highways, walkways, parking lots and concrete slab buildings
- To aid in water filtration & velocity controls within the specifications for various Erosion Controls, including but not limited to:
 - Storm Management Ponds
 - Water Run-off Areas
 - Infiltration Trenches
- Used during many construction projects, including but not limited to:
 - Roads, Bridges and Parking lots
 - Housing and Apartment Development
 - Schools and Hospitals
 - Commercial Buildings, Retail Spaces, Indoor and Outdoor Malls
 - Utilities uses- Sewer Systems, Drainage Pits
 - Erosion Controls

Our current production of materials consists of various sized aggregates including Stone Dust, CR-6, #8 Stone, #57 Stone, #2 Stone. Uses for the various sized stone can be found under Products.
